

Business solutions available for:
CorelDRAW® Graphics Suite and CorelDRAW® Technical Suite

Design better together with the solution that delivers value across your organization.

When it comes to purchasing software, your organization deserves the flexibility to make the right choice for its needs, which is why we don't believe in a one-size-fits-all approach to licensing.

You can decide whether to opt for a corporate subscription, or a business license, with both solutions providing you the best option for cost-effective, large-scale deployment.

Greater choice. Ongoing value.

Corporate subscription

A CorelDRAW corporate subscription is a flexible payment plan tailored to fit any size business, providing the lowest up-front costs for deploying the software across your organization. Our corporate subscription comes in 1-, 2- and 3-year options, and the longer the term you choose, the greater the saving. Renewal options are also available and opting for a subscription means your organization will be guaranteed access to the latest release of new tools, enhanced features and supporting technology. Our corporate subscription plans offer the flexibility to run the previous version of the software beyond its lifecycle, while teams or the wider organization migrate to the latest version.

Business license

A CorelDRAW business license can be deployed as a single seat and is built to scale. This perpetual plan requires a one-off payment which gives your organization the right to own CorelDRAW outright. Along with huge cost savings awarded to larger site installations, the business license includes CorelSure Maintenance for the first year. If you stay on a continuous CorelSure plan (we offer a 1-year renewal option) you will significantly reduce your overall investment over time, and keeping your CorelSure Maintenance active, will provide you the same guaranteed access to the latest tools, enhanced features and supporting technology updates as a corporate subscription.

Additional benefits and comparisons between the two options can be seen on page 4.

Corporate subscription and license pricing

Pricing levels begin at one seat and scale from there. If you opt for a corporate subscription, you can experience discounting from as little as 5 seats. Our license pricing offers generous level 4 discounted pricing to government agencies, charities, non-profits, and educational organizations. Whatever your needs, our sales team is always on hand to put together a personalized quote for you.

Pricing levels	Number of seats
Subscription and business license Level 1	1-4
Subscription and business license Level 2	5-50
Subscription and business license Level 3	51-250
Subscription and business license Level 4	250+
Subscription only, Level 5	251+

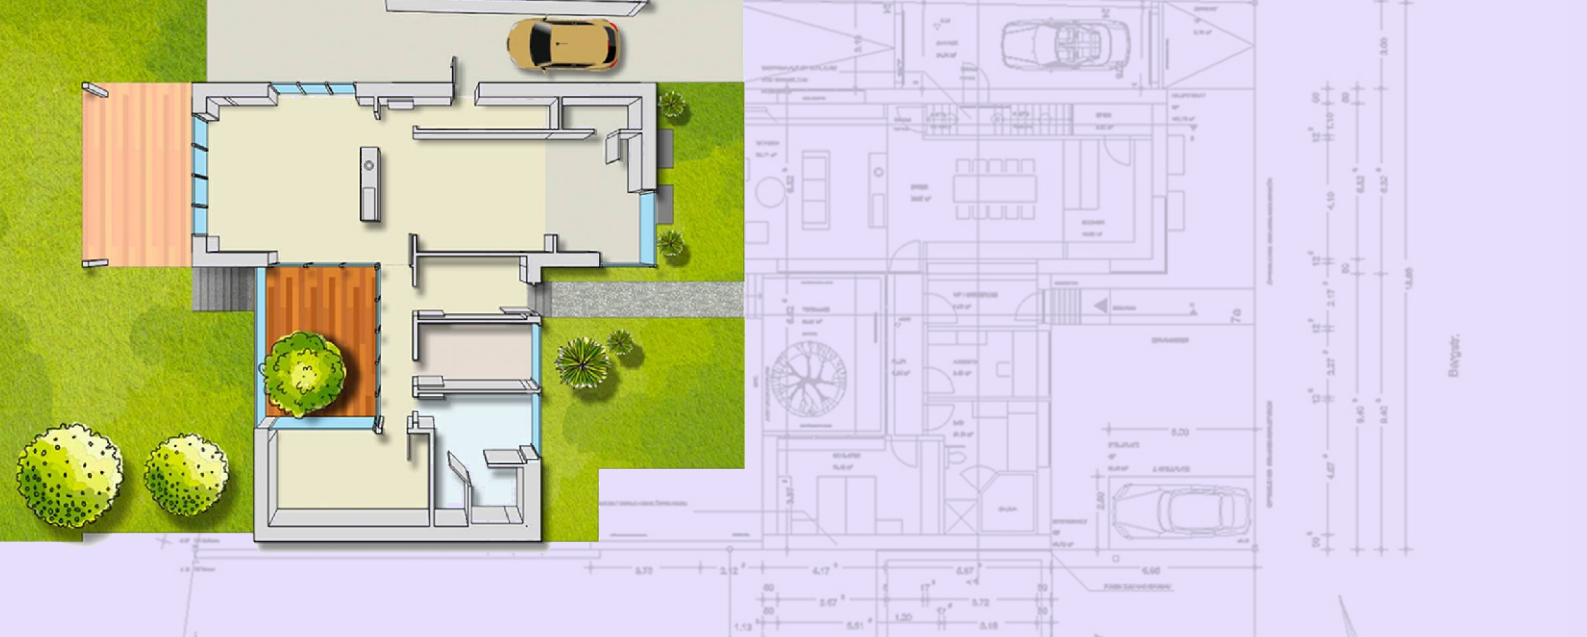

CorelSure Software Maintenance

All business licenses come with CorelSure Maintenance for the first year, providing you with the latest technology, support, and peace of mind to do exceptional work and produce extraordinary results. It's important to note that you need to stay on a continual renewal program to reap the benefits of CorelSure Maintenance. If you decide to let the plan expire, it cannot be resumed at a later point in time.

By keeping your CorelSure plan active, you will benefit from:

- **Up-to-the-minute updates:** Guaranteed access to the next release of CorelDRAW as soon as it's available. Under an active plan you also have the choice to use the latest and previous version of the software to enable you to migrate your organization gradually.
- **Multi-platform use:** CorelSure covers the deployment of both CorelDRAW Graphics Suite for Windows or CorelDRAW Graphics Suite for Mac across your organization at no additional cost.
- **Discounting and price protection:** With CorelDRAW business licenses, cumulative license discounts are available, so your organization will benefit from further cost savings if additional licenses are added later on.
- **Centralized control and compliance:** CorelSure gives you control over your software distribution and activity. Your IT administrator has the flexibility to provision, track and deploy the software based on your organization's security requirements, plus with a single key you can install multiple copies, enabling a smoother, faster, centralized deployment.
- **Global licensing and language support:** CorelSure makes it easy for your business to respond to the demands of a global marketplace and workforce. You can request any available language you need—up to 16 languages are available—and the benefits of CorelSure will be extended to all licenses you acquire during your coverage period, without additional cost or effort.
- **Platform virtualization:** With the help of common virtualization technologies, CorelDRAW products support desktop virtualization as part of CorelSure Maintenance. This offers you additional flexibility in deployment.
- **Quick start launch guidance for larger deployments:** For larger deployments of 10+ seats, you'll receive a dedicated team guiding you step-by-step through the launch process, setting you up for problem-free success from the get-go.
